DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5 and 10 claimed flight software with instructions that reside inside a computer-readable medium executed by a processor onboard the spacecraft. However, the flight software with instructions is a double inclusion of elements in view of claim 1, line 4, where set of instructions are already claimed. The examiner believes that flight software is set of instructions. Plus, applicant already claimed a processor in claim 1, line 4. Also the computer readable medium is the memory element claimed in claim 1. Claim 10 also have double inclusion of elements in view of claim 6. Finally, claims 5 and 10 failed to narrow the scope of the invention.

Allowable Subject Matter

Claims 1-4, 6-9, and 11 are allowed.
